DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 9-33 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Applicant has amended claim 9 and added new independent claims 16, 22, and 28, all of which now state that the “polyolefin precursor/filler blend” is combined with “an additive in its solid state from a group consisting of ...”. When contacted by the examiner to show support in the specification for this feature, the applicant pointed to the table on page 14 of the specification, stating that the Melt Flow Indexes listed in that table were representative of materials in their solid state. While this may be true, the specification still fails to state that these materials, when combined as an additive as in the claims, are actually in a solid state.
